**Subject:** Blessings Compost - tentative corrections

Hi Bill,

I am working with Blessings Compost to implement changes at the site. We are tentatively preparing an Administrative Order which would require them to implement site changes.

Generally we are asking for:

- 1) a plan for coverage of compost pile material, which it sounds like they already have; and
- 2) a plan for a bmp(s) that aren't overhead coverage to address potential runoff from the non-compost pile materials (wood chips, yard waste, etc.)

It sounds like this is work they are already performing. Do you have any comments or suggestions? The bmps for non-compost material would be something we would ask their contractor to provide the designs for.

Thanks,

Mike Greenwald
